JACK BERMAN
 PRIMARY EXAMINER

The following is an examiner's statement of reasons for allowance: Applicants argument that the various embodiments of the invention using different diffractive elements (phase photon sieves, blazed Fresnel zone plates, apodized Fresnel zone plates, etc.) all fall into a broader category of diffractive elements having a focusing efficiency of at least 50%, so that claims 11 and 12 are enabled under 35 U.S.C. 112, first paragraph, is convincing; and the claims are patentable over the combination of Raj, Smith, and Johnson cited in the previous Office action because the examiner misread the Johnson patent. Johnson teaches, from line 58 in column 9 through line 52 in column 11, to apodize only the projection aperture 7, not each microlens aperture 32, 34, 35 as the examiner previously understood it.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack I. Berman whose telephone number is (571) 272-2468. The examiner can normally be reached on M-F (8:30-6:00) with every second Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R. Lee can be reached on (571) 272-2477. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
